PROJECT OVERVIEW

Member app and admin portal for a professional referral network

Regions, circles, referral tracking, events and payments on web, Android and iOS. Delivered in phases.

Member app and admin portal for a professional referral network

Regions, circles, referral tracking, events and payments on web, Android and iOS. Delivered in phases.

CLIENT	INDUSTRY	PLATFORMS
An Indian professional referral and networking community	**Software products and SaaS**	**Web, Android, iOS**

THE REQUIREMENT

The network runs as regions and circles of verified professionals, each with its own leaders. It needed role-based control, referral tracking, events, payments and a members-only feed rather than an open social network. Digital-only members had to fit in without weakening those controls.

WHAT WE BUILT

We designed a web app for platform, region and circle admins and a mobile app for leaders and members, on shared back-end APIs. Each role sees only its own scope. Actions are logged for audit, and payments generate invoices automatically. The platform is in development.

THE OUTCOME

As designed, admins run regions and circles, appoint leaders, approve referrals and events and see role-based reports. Members manage verified profiles, pass and track referrals, RSVP, register visitors and pay fees in the app. Not yet launched.

CLIENT PROJECT

What it does

In short: referrals, events and fees in one place.

Role hierarchy

Platform, region and circle admins on the web; leadership and regular members on mobile. Each role sees only its scope.

Regions and circles

Platform admins create regions and circles, appoint admins and set rules and access controls.

Referral management

Members give, receive and update referrals; circle admins approve and track them.

Events, RSVP and visitors

Circle meetings and regional or virtual events with approval, RSVP and visitor registration.

Virtual circles

Digital-only professionals join virtual circles with verified profiles and limited referral access.

Moderated wall

Members post, react and comment within set limits, and circle admins moderate the feed.

Payments and sponsorships

Tiered memberships and fees paid online with automatic invoices, plus sponsorship placements at each level.

Audit logs and dashboards

Activity is logged, and each role gets reports for its own scope.

BUILT WITH

React · React Native · Node.js · Express.js · MongoDB · Firebase · AWS · GitHub Actions · Git

PLATFORMS

Web · Android · iOS

SERVICES

- Web application development
- Mobile app development
- SaaS and MVP development

WORKING WITH US

How a project runs

The same four stages for every project, with working software early and the option to stop after any stage.

STAGE 1

Audit

We map the current process and agree on a first release.

STAGE 2

Trial

A working version on your data before the full build.

STAGE 3

Build

Weekly working demos, integrated with your systems.

STAGE 4

Go live

Rollout to one team, then company-wide.

INCLUDED IN EVERY QUOTATION

- Written scope with dated milestones
- Testing before delivery
- Documentation for your team
- Weekly working demo
- Code in your repository from day one
- Free bug fixes in the warranty period after launch

OUR PROMISES

- **NDA before anything**
- **You own all the code**
- **Your first call is with a founder**

Planning something similar?

Send us a few lines about your project. A founder replies within 4 business hours with an indicative cost and timeline, free and with no obligation.
