

CLIENT PROJECT

Business referral network: member app and admin portal

An Indian professional referral and networking community

IN SHORT

A referral network platform in development connects regions, circles and members, with role-based administration, referral tracking, events and payments.

THE CHALLENGE

The network runs as regions and circles of verified professionals, each with its own leaders. It needed role-based control, referral tracking, events, payments and a members-only feed rather than an open social network. Digital-only members had to fit in without weakening those controls.

WHAT WE BUILT

We designed a web app for platform, region and circle admins and a mobile app for leaders and members, on shared back-end APIs. Each role sees only its own scope. Actions are logged for audit, and payments generate invoices automatically. The platform is in development.

AT A GLANCE

INDUSTRY

Software products and SaaS

SERVICES

Web application development

Mobile app development

SaaS and MVP development

PLATFORMS

Web

Android

iOS

THE RESULT

As designed, admins run regions and circles, appoint leaders, approve referrals and events and see role-based reports. Members manage verified profiles, pass and track referrals, RSVP, register visitors and pay fees in the app. Not yet launched.

BUILT WITH

React, React Native, Node.js, Express.js, MongoDB, Firebase, AWS, GitHub Actions, Git

KEY FEATURES

■ Role hierarchy

Platform, region and circle admins on the web; leadership and regular members on mobile. Each role sees only its scope.

■ Referral management

Members give, receive and update referrals; circle admins approve and track them.

■ Virtual circles

Digital-only professionals join virtual circles with verified profiles and limited referral access.

■ Payments and sponsorships

Tiered memberships and fees paid online with automatic invoices, plus sponsorship placements at each level.

■ Regions and circles

Platform admins create regions and circles, appoint admins and set rules and access controls.

■ Events, RSVP and visitors

Circle meetings and regional or virtual events with approval, RSVP and visitor registration.

■ Moderated wall

Members post, react and comment within set limits, and circle admins moderate the feed.

■ Audit logs and dashboards

Activity is logged, and each role gets reports for its own scope.
