THE REQUIREMENT

A healthcare provider in India needed software to run its hospital's day-to-day administration, built around how the hospital works.

WHAT WE BUILT

We built a hospital management system for the provider, covering the hospital's daily administration, to the provider's own requirements.

THE OUTCOME

The hospital has one system for its day-to-day administration, built to its own requirements.

CLIENT PROJECT

What it does

In short: one system built to the hospital's rules.

Hospital administration

One system for the administration that keeps the hospital running day to day.

Built to the hospital's requirements

The system was built around the provider's own requirements for how its hospital is run.

Made for hospital staff

Hospital staff handle the daily administration in a single system made for their hospital.

WORKING WITH US

How a project runs

The same four stages for every project, with working software early and the option to stop after any stage.

STAGE 1

Audit

We map the current process and agree on a first release.

STAGE 2

Trial

A working version on your data before the full build.

STAGE 3

Build

Weekly working demos, integrated with your systems.

STAGE 4

Go live

Rollout to one team, then company-wide.

INCLUDED IN EVERY QUOTATION

- Written scope with dated milestones
- Testing before delivery
- Documentation for your team
- Weekly working demo
- Code in your repository from day one
- Free bug fixes in the warranty period after launch

OUR PROMISES

- **NDA before anything**
- **You own all the code**
- **Your first call is with a founder**

Planning something similar?

Send us a few lines about your project. A founder replies within 4 business hours with an indicative cost and timeline, free and with no obligation.
