

CLIENT PROJECT

Interest-based social networking app for a US startup

A US social networking startup

IN SHORT

A US social platform built around shared interests, where people find others like them, then post and react in a familiar feed.

THE CHALLENGE

The founders wanted a social network built around shared interests rather than existing friendships.

WHAT WE BUILT

We built a social platform where people with the same interests find each other, post and react in a familiar feed format.

THE RESULT

People can find others who share their interests and interact with them through posts and reactions.

AT A GLANCE

INDUSTRY

Startups

SERVICES

SaaS and MVP development

Mobile app development

Web application development

PLATFORMS

Web

Android

iOS

Read the full project: <https://itechnosol.com/our-work/interest-based-social-network-us/>

BUILT WITH

React, React Native, Node.js,
Express.js, MongoDB, Firebase,
AWS, Docker, GitHub Actions, Git

KEY FEATURES

■ Interest-based discovery

People find others who share the same interests.

■ Posts

Members share posts with people who have similar interests.

■ Reactions

Members react to posts in a familiar social feed.

Planning something similar?

Send us a few lines about your project. A founder replies within 4 business hours with an indicative cost and timeline, free and with no obligation.
