

## CLIENT PROJECT

# Manufacturing ERP customization for an existing system

A manufacturing company

## IN SHORT

A manufacturer kept the ERP its team already knew and gained new functionality inside it, instead of moving to a new platform.

## THE CHALLENGE

A manufacturer already ran its operations on an ERP and needed it to do more.

## WHAT WE BUILT

We built an extension to the manufacturer's existing ERP rather than replacing the system.

## THE RESULT

The manufacturer kept the ERP its team already used and gained the added functionality.

## AT A GLANCE

## INDUSTRY

Manufacturing

## SERVICES

ERP development

Custom software development

## PLATFORMS

Web

## BUILT WITH

React, Node.js, Express.js, MongoDB, AWS, GitHub Actions, Git

## KEY FEATURES

■ **ERP extension**

New functionality added to the manufacturer's existing ERP, working alongside what was already there.

■ **No system replacement**

The manufacturer kept the ERP its team already used instead of moving to a new platform.

■ **One system for staff**

The added functionality sits inside the existing ERP, so there is no separate tool to open.
