THE REQUIREMENT

The client needed a professional website that worked on desktop and mobile, showed their work through photographs and could be updated without a developer.

WHAT WE BUILT

We designed one semi-custom concept, revised it once with the client and built it on a content management system, with up to seven pages, a slideshow, a photo gallery and an email contact form. We set up Google Analytics and hosting.

THE OUTCOME

The client has a mobile-friendly site they edit themselves, with inquiries arriving by email and visits tracked in Google Analytics.

What it does

In short: the client updates the site alone.

✓ **Semi-custom design**

One design concept with a round of revisions, built for desktop and mobile.

✓ **Contact form**

An email contact form for inquiries.

✓ **Slideshow and gallery**

A four-slide image slideshow and a gallery of up to 15 photographs.

✓ **Editable without a developer**

Up to seven pages or sections the client updates in a content management system.

How a project runs

The same four stages for every project, with working software early and the option to stop after any stage.

STAGE 1

Audit

We map the current process and agree on a first release.

STAGE 2

Trial

A working version on your data before the full build.

STAGE 3

Build

Weekly working demos, integrated with your systems.

STAGE 4

Go live

Rollout to one team, then company-wide.

INCLUDED IN EVERY QUOTATION

- ✓ Written scope with dated milestones
- ✓ Testing before delivery
- ✓ Documentation for your team
- ✓ Weekly working demo
- ✓ Code in your repository from day one
- ✓ Free bug fixes in the warranty period after launch

OUR PROMISES

- NDA before anything
- You own all the code
- Your first call is with a founder
