

CLIENT PROJECT

Portfolio website with an editable photo gallery

An individual client in India

IN SHORT

An individual client in India now has a mobile-friendly portfolio site with a slideshow, gallery and contact form, and updates it without a developer.

THE CHALLENGE

The client needed a professional website that worked on desktop and mobile, showed their work through photographs and could be updated without a developer.

WHAT WE BUILT

We designed one semi-custom concept, revised it once with the client and built it on a content management system, with up to seven pages, a slideshow, a photo gallery and an email contact form. We set up Google Analytics and hosting.

AT A GLANCE

INDUSTRY

Startups

SERVICES

Web application development

PLATFORMS

Web

BUILT WITH

Content management system, PHP, MySQL, HTML5, CSS3, Google Analytics

THE RESULT

The client has a mobile-friendly site they edit themselves, with inquiries arriving by email and visits tracked in Google Analytics.

KEY FEATURES

■ Semi-custom design

One design concept with a round of revisions, built for desktop and mobile.

■ Contact form

An email contact form for inquiries.

■ Slideshow and gallery

A four-slide image slideshow and a gallery of up to 15 photographs.

■ Editable without a developer

Up to seven pages or sections the client updates in a content management system.
