WHAT WE BUILT

We built an integration between the business's system and QuickBooks using the QuickBooks API.

THE OUTCOME

Financial data entered in the business's system reaches QuickBooks without being typed in twice.

CLIENT PROJECT

What it does

In short: figures reach the accounts without retyping.

System-to-QuickBooks connection
The business's own system passes financial data to QuickBooks through its API.

No double entry
Staff enter the data once instead of in two places.

QuickBooks stays the books
The accounts are still kept in QuickBooks, filled by the integration rather than by retyping.
