CLIENT	INDUSTRY	PLATFORMS
A school ERP provider in India	**Education**	**Android, iOS**

THE REQUIREMENT

A school ERP provider needed a mobile app so schools could use its system from a phone, not only a desktop.

WHAT WE BUILT

We built the mobile app for the provider's school ERP, connected to the existing system.

THE OUTCOME

Schools using the ERP can reach it from a phone.

CLIENT PROJECT

What it does

In short: the same records from a phone.

Mobile access to the ERP

The school ERP is available in a phone app, not only on a desktop.

Connected to the existing system

The app works with the provider's ERP instead of running as a separate product.

One set of school data

The app works from the same school data as the desktop system, so there is no copy to keep in step.

WORKING WITH US

How a project runs

The same four stages for every project, with working software early and the option to stop after any stage.

STAGE 1

Audit

We map the current process and agree on a first release.

STAGE 2

Trial

A working version on your data before the full build.

STAGE 3

Build

Weekly working demos, integrated with your systems.

STAGE 4

Go live

Rollout to one team, then company-wide.

INCLUDED IN EVERY QUOTATION

- Written scope with dated milestones
- Testing before delivery
- Documentation for your team
- Weekly working demo
- Code in your repository from day one
- Free bug fixes in the warranty period after launch

OUR PROMISES

- **NDA before anything**
- **You own all the code**
- **Your first call is with a founder**

Planning something similar?

Send us a few lines about your project. A founder replies within 4 business hours with an indicative cost and timeline, free and with no obligation.
