

CLIENT PROJECT

School staff run admin from their own phones with one ERP

Schools

IN SHORT

Staff run school administration from a browser or the Android and iPhone devices they already own, so the school bought no new hardware to roll it out.

3

platforms: web, Android and iPhone

THE CHALLENGE

Staff needed to handle school admin wherever they were working, and the school did not want to buy new devices to make that possible.

WHAT WE BUILT

We built a school management ERP that runs in any web browser and as Android and iPhone apps.

AT A GLANCE

INDUSTRY

Education

Read the full project: <https://itechnosol.com/our-work/school-management-erp/>

THE RESULT

Staff manage school admin on devices they already carry, so the rollout needed no hardware spend.

SERVICES

ERP development

Web application development

Mobile app development

PLATFORMS

Web

Android

iOS

BUILT WITH

React, React Native, Node.js, Express.js, MongoDB, Firebase, AWS, GitHub Actions, Git

KEY FEATURES

■ Browser access

Staff open the system from any web browser.

■ No new hardware

The rollout used devices the school and its staff already had.

■ Android and iPhone apps

The same school admin, on the phones staff already carry.
