

CLIENT PROJECT

Web-based school administration software in India

An education technology company in India

IN SHORT

Schools in India now run their daily administration in one web-based system, instead of separate tools and paper.

THE CHALLENGE

Schools in India needed one system to run their daily administration, instead of spreading it across separate tools and paper.

WHAT WE BUILT

We built web-based school management software that schools open in a browser to run their daily administration.

THE RESULT

Schools can run their daily administration in one system.

AT A GLANCE

INDUSTRY

Education

SERVICES

Custom software development

Web application development

PLATFORMS

Web

BUILT WITH

React, Node.js, Express.js, MongoDB, AWS, GitHub Actions, Git

KEY FEATURES

■ **School administration**

Schools manage their day-to-day administration in one system.

■ **A product to offer schools**

Built as a product schools can adopt, not a one-off tool tied to a single campus.

■ **Runs on the web**

Schools use the software on the web.
