PROJECT OVERVIEW

Task status dashboard for multi-team operations

Every team's progress on one web screen, so managers see the state of work without chasing updates.

Task status dashboard for multi-team operations

Every team's progress on one web screen, so managers see the state of work without chasing updates.

CLIENT	INDUSTRY	PLATFORMS
Operations teams	**Operations and logistics**	**Web**

THE REQUIREMENT

Managers had to chase people for updates to learn where tasks stood, and status meetings ate into working time.

WHAT WE BUILT

We built a custom dashboard that shows the status of every team's tasks on one screen.

THE OUTCOME

Managers see progress at a glance without chasing anyone, and less time goes into status meetings.

1

screen for every team's task status

CLIENT PROJECT

What it does

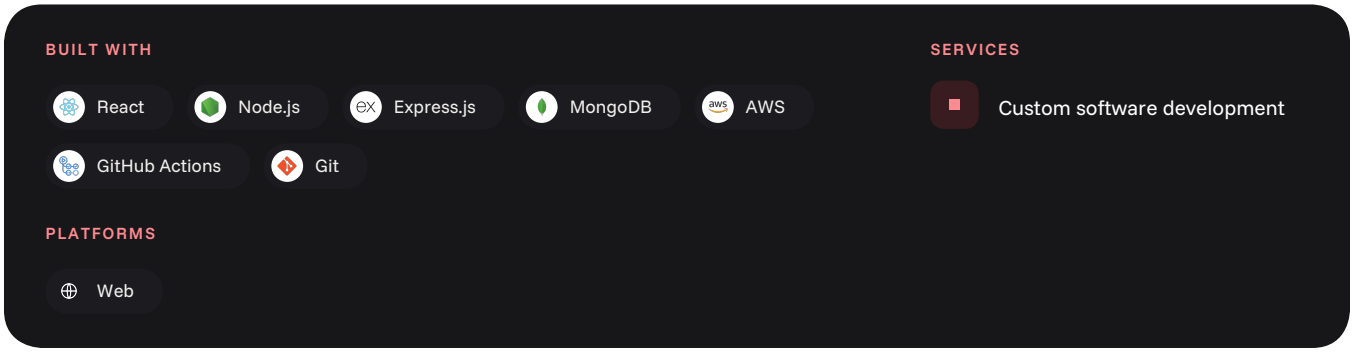

In short: every team's progress on one screen.

Every team's tasks on one screen

Managers see where each task stands without asking for updates.

Less time in status meetings

Time once spent collecting updates goes back into the work.

WORKING WITH US

How a project runs

The same four stages for every project, with working software early and the option to stop after any stage.

STAGE 1

Audit

We map the current process and agree on a first release.

STAGE 2

Trial

A working version on your data before the full build.

STAGE 3

Build

Weekly working demos, integrated with your systems.

STAGE 4

Go live

Rollout to one team, then company-wide.

INCLUDED IN EVERY QUOTATION

- Written scope with dated milestones
- Testing before delivery
- Documentation for your team
- Weekly working demo
- Code in your repository from day one
- Free bug fixes in the warranty period after launch

OUR PROMISES

- **NDA before anything**
- **You own all the code**
- **Your first call is with a founder**

Planning something similar?

Send us a few lines about your project. A founder replies within 4 business hours with an indicative cost and timeline, free and with no obligation.
