

CLIENT PROJECT

Used cooking oil collection software: pickups and credits

A used cooking oil collection company in Canada

IN SHORT

A web portal where businesses in Canada book used cooking oil pickups and track the credit they earn for the oil collected.

THE CHALLENGE

A Canadian used cooking oil collector needed one place for businesses to request pickups and see the credit they earn for the oil collected.

WHAT WE BUILT

We built a web portal where businesses book pickups and the collector records the credit each business earns.

THE RESULT

Businesses book collections and see their credit in one place.

AT A GLANCE

INDUSTRY

Operations and logistics

SERVICES

Web application development

Workflow automation

PLATFORMS

Web

BUILT WITH

React, Node.js, Express.js, MongoDB, AWS, GitHub Actions, Git

KEY FEATURES

■ Pickup booking

Businesses request a collection of used cooking oil through the portal.

■ Credit tracking

Each business sees the credit it has earned for oil collected.

■ Credit records for the collector

The collector records the credit each business earns, in the same portal its customers use.
